🔗 📊 COMMON SOC / SIEM ALERTS (SOURCE-WISE) VS SOC Daily Reality

- Source-wise alerts SOC teams see daily
- Expanded & practical — real SOC life

Swipe ➡

🔐 DLP Alerts

- Sensitive data exfiltration detected
- PII / PCI / PHI shared externally
- Upload to personal cloud storage (Drive, Dropbox, OneDrive personal)
- Email with sensitive attachment sent externally
- Mass file download from cloud storage
- Unauthorized USB device usage
- Copying sensitive files to removable media
- Screenshot / print of sensitive documents
- Upload of source code or IP to external sites
- Data transfer to unsanctioned SaaS apps
- Excessive file access by single user
- File encryption before upload (possible staging)
- Policy violation: data sharing outside allowed domain
- Insider threat anomaly (behavioral DLP)

⍰ EDR Alerts

- Malware detected / quarantined
- Suspicious process execution
- Executable running from temp / user directories
- PowerShell with encoded or obfuscated commands
- Command-line abuse (cmd, wmic, net.exe, rundll32)
- LSASS access / credential dumping attempt
- Unauthorized script execution (VBS, JS, BAT)
- Process injection detected
- Persistence mechanism detected (registry, scheduled task, service)
- Ransomware behavior detected
- Fileless malware activity
- Lateral movement tools detected (PsExec, WMI)
- Defense evasion (EDR tampering / service stopped)
- Exploit behavior detected
- Suspicious parent-child process chain
- Abnormal network connections from endpoint

🪪 💼 AD / Identity Alerts

- Multiple failed login attempts
- Successful login after multiple failures
- Login from unusual location / impossible travel
- Privileged group membership change
- New domain admin added
- Kerberoasting ticket request detected
- DCSync replication abuse
- Pass-the-Hash / Pass-the-Ticket activity
- Account lockout events
- Password reset or change
- Delegation attribute modification
- Admin logon outside business hours
- Service account misuse
- Disabled account login attempt
- Stale account re-enabled
- SID history modification
- GPO modification
- NTLM downgrade detected
- MFA fatigue / push bombing
- MFA bypass or MFA disabled
- Legacy authentication used (IMAP/POP/Basic Auth)

🌐 Network / Firewall Alerts

- Port scanning detected
- Intrusion attempt (IPS/IDS signature hit)
- Malicious IP/domain communication
- C2 traffic detected
- DNS queries to suspicious domains
- Beaconing behavior detected
- Data exfiltration over unusual ports
- Unusual outbound traffic spike
- Unauthorized inbound connection attempt
- VPN brute-force attempts
- VPN login from suspicious IP
- Geo-blocked country traffic detected
- East-west lateral movement traffic
- TOR / proxy traffic detected

📧 Email / Antivirus Alerts

- Phishing email detected
- User-reported phishing
- Malicious attachment blocked
- Malicious URL clicked
- Email spoofing attempt
- BEC (Business Email Compromise) indicators
- Malware detected by AV
- Spam with embedded scripts
- QR-code phishing detected
- HTML smuggling detected
- Email forwarding rule created
- Suspicious mailbox rule detected

☁ Cloud / SaaS Alerts

- Risky cloud sign-in
- Impossible travel (cloud login)
- New admin role assigned
- API token misuse
- Excessive data download from SaaS
- Unsanctioned app OAuth consent
- Cloud storage publicly shared
- Cloud workload compromise
- Suspicious cloud service creation
- Deletion of cloud audit logs

⚭ SIEM / Correlation / UEBA Alerts

- Failed login followed by success
- Privilege escalation correlation
- Multi-source attack chain detected
- Identity + endpoint compromise correlation
- Insider threat behavioral anomaly
- Impossible travel + MFA fatigue
- Brute force followed by VPN access
- Credential stuffing pattern detected
- Anomalous user behavior (UEBA)
- Threat intel match (IOC hit)

SOC Daily Reality

Most common alerts handled daily

- Failed logins
- Phishing emails
- Malware quarantined
- Suspicious PowerShell
- Malicious IP communication
- Unusual login location
- Privilege changes
